

21st April, Nairobi

Liz Drake, Section Head, Social Protection, Emergencies and
Resilience

DFID Kenya

What does graduation mean?

1. Crossing an asset threshold?

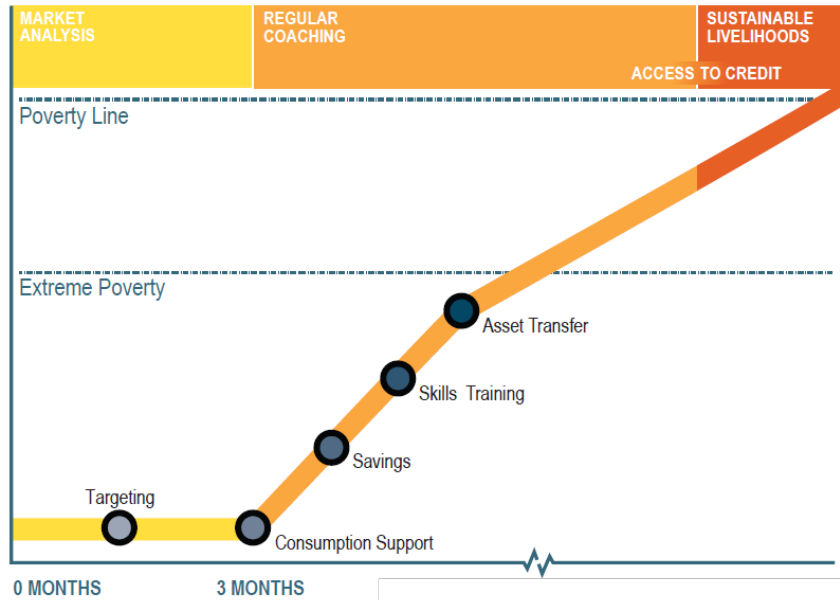

2. Exit from social programme support?

3. Overcoming extreme poverty?

Maintaining an independent, sustainable livelihood and being able to withstand a certain level of shocks.

A range of models and approaches

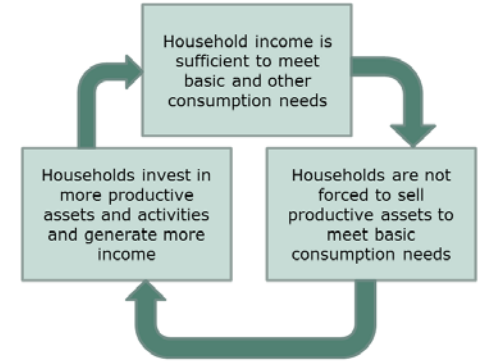

THE GRADUATION MODEL

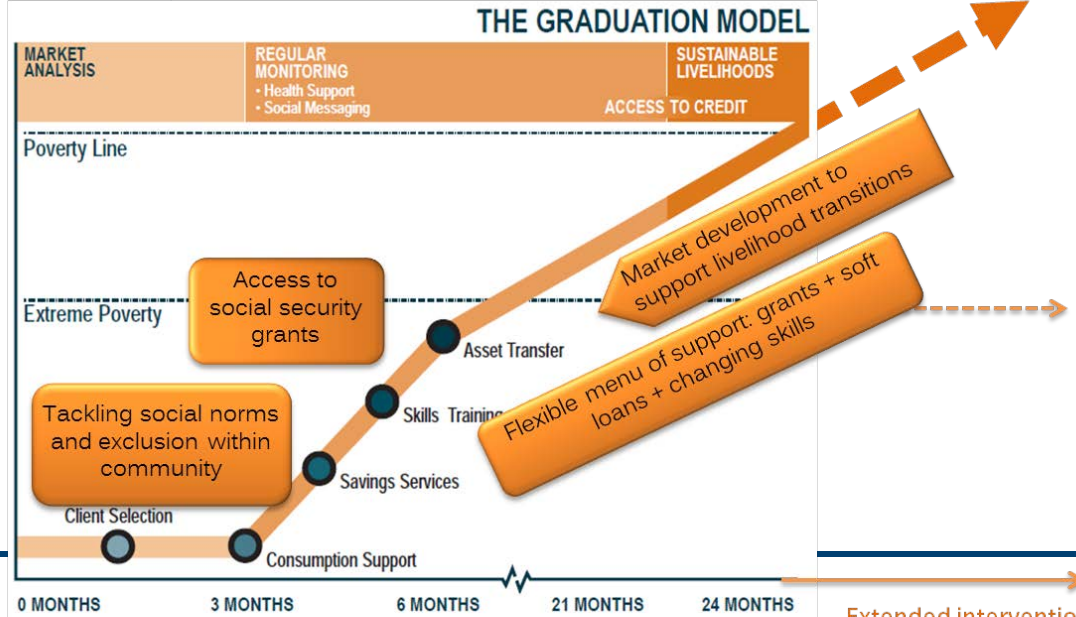

Without social protection:

With social protection:

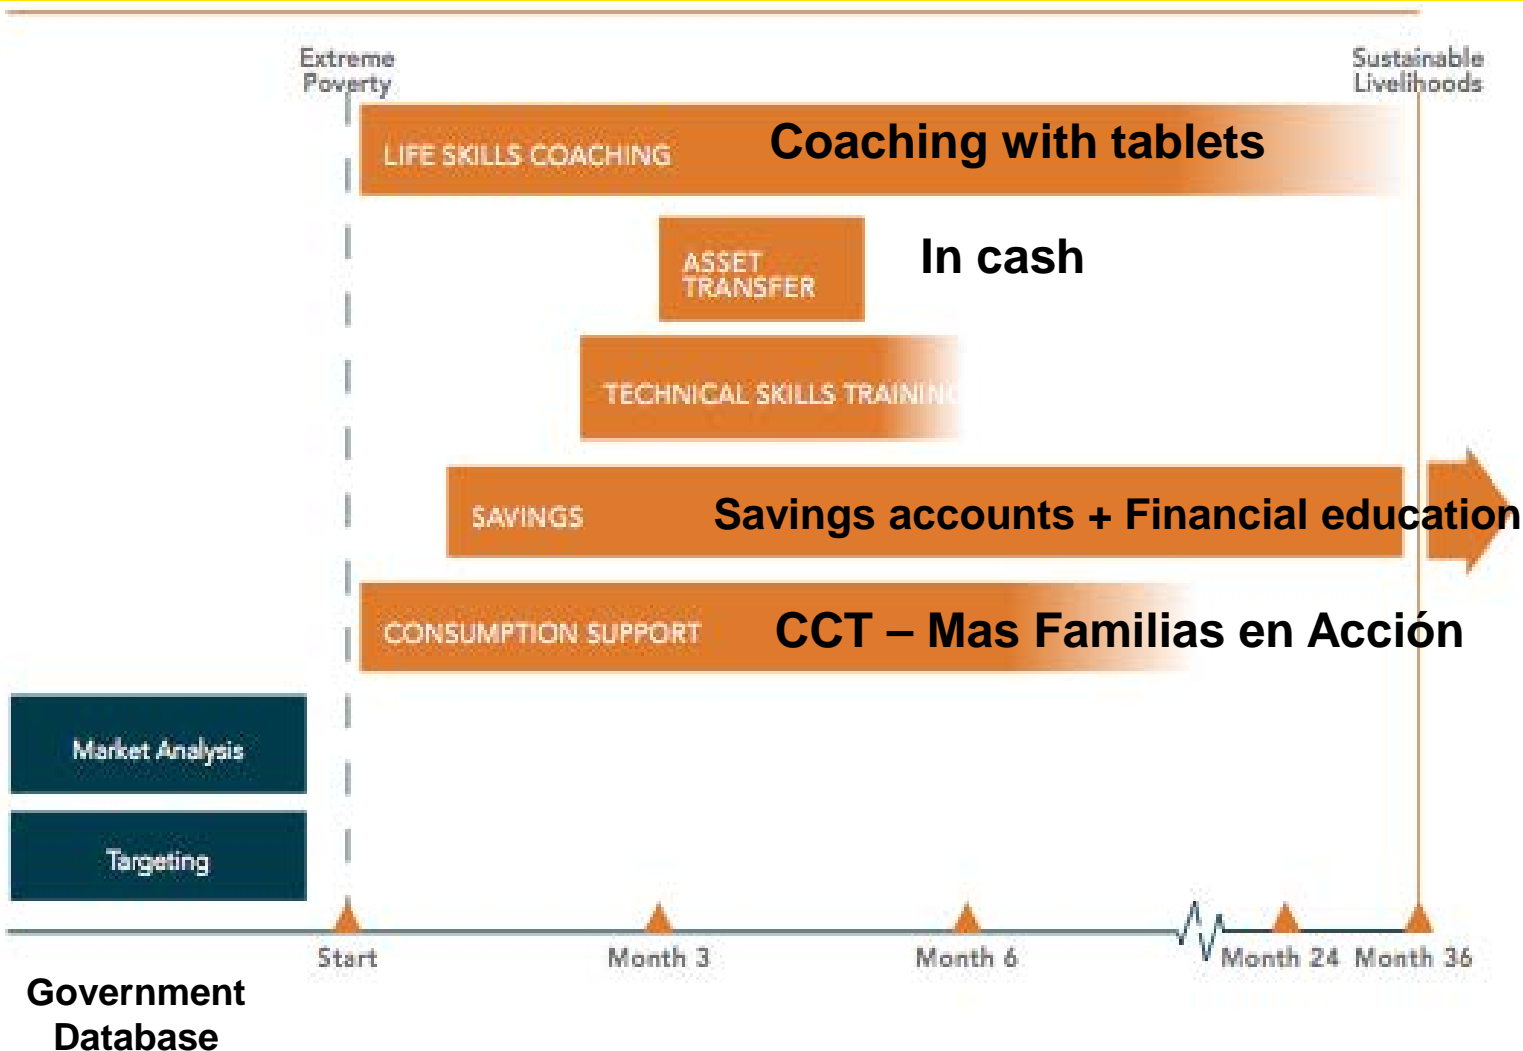

THE GRADUATION MODEL

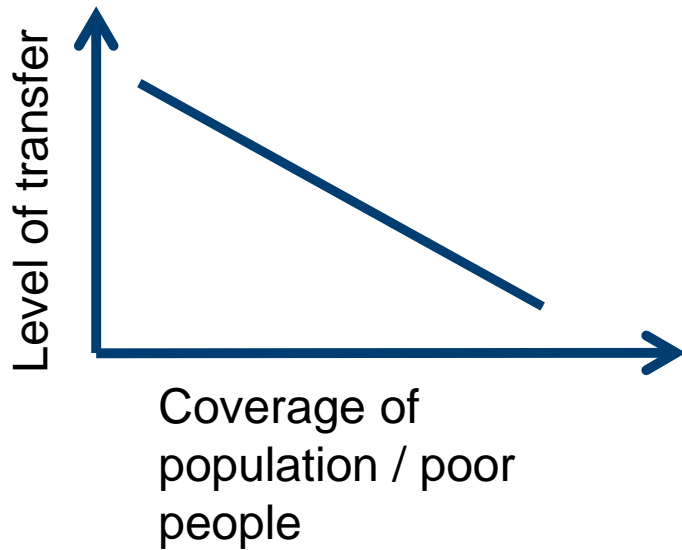

Extended intervention time-frame

BRAC – CGAP – FF Fundación Capital

<http://fundacioncapital.org/economic-citizenship/graduation-program/?lang=en>

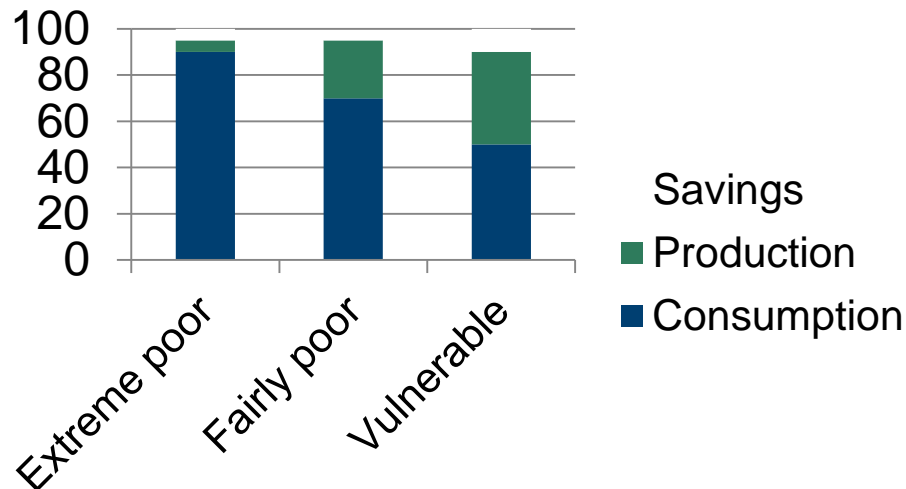

Be clear on the trade offs...

1. Level of transfer vs coverage

2. Who to target?

3. Mind the Gap! Arbitrary thresholds....

Distribution of transfer use by wealth category

Income / asset value

b

Leave programme on reaching income level b

Income $> a$ = ineligible for programme

no support
no transfers

a

Income $< a$ = eligible for programme

- **B'desh portfolio: large 'graduation' progs; package inputs to enable the extreme poor 'graduate' out of extreme poverty.**

- BRAC Challenging the Frontiers of Poverty Reduction-Targeting the Ultra Poor
- Chars Livelihoods Programme
- Economic Empowerment of the Poorest
- Programme Initiatives for Monga Eradication (PRIME)

- **Rwanda: Vision 2020 Umurenge Programme (Rwanda)**
- **Productive Safety Net Programme (Ethiopia)**

What does the evidence (DFID +) say?

Where	What	Results	Qs ?
Bangladesh since 04	Evaluations RCTs Panel surveys (some unpublished) Micro simulations	<ul style="list-style-type: none"> • Large and sustained av impacts on: earnings; consumption; assets; occ. Choices for eligible poor • 4yrs later womens annual earnings +se av 38% • 7yrs sig* +se ppt income, primary enrolment, self employment, consumption, dietary diversity • +sed HH income 2.5yrs later • Change income source (< wage labour) • 'Graduation index' +se • Incidence of extreme poverty –sed • BCR 4.1 	<ul style="list-style-type: none"> • Size of effect? BRAC now at around 400K HHs but others in the RCT are NGO's at around 10K max HHs. • 20:60:20 • Vulnerability to shocks • Labour constrained HHs • Asset/ IGA traps • ? Skills development • Costs of the model • Microfinance? Poverty reduction? • LH viable? =Strategy? • Women –economic empowerment = social empowerment
6 country case studies	RCT Banerjee et al (2015)	<i>To be talked about today</i>	

Questions

<http://www.ids.ac.uk/publication/graduating-from-social-protection>)

- 1. What does ‘graduation’ mean for Kenya? Exit?/
Threshold/ Sustainable pathway out of extreme poverty?**
- 2. What is our model/ approach? Implications?**
- 3. What trade offs are we prepared to make? Why?**
- 4. Who really benefits? Labour constrained?**
- 5. Costs and scale? Is it scalable by Govts, particularly in
the ASALs? How to reduce costs?**
- 6. How to avoid asset/ IGA ‘traps’? Saturation,
particularly in thin markets like the ASALs?**
- 7. How to build a consolidated, quality evidence base of
what works in Kenya?**

How to avoid this?!
